

## AUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2022

AND DECEMBER 31, 2021

# Independent auditor's report

To the Shareholders of Karve Energy Inc.

## **Our opinion**

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of Karve Energy Inc. and its subsidiary (together, the Company) as at December 31, 2022 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS).

## What we have audited

The Company's consolidated financial statements comprise:

- the consolidated statement of financial position as at December 31, 2022;
- the consolidated statement of net income and comprehensive income for the year then ended;
- the consolidated statement of changes in shareholders' equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the consolidated financial statements, which include significant accounting policies and other explanatory information.

## **Basis for opinion**

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Independence

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada. We have fulfilled our other ethical responsibilities in accordance with these requirements.

## **Other information**

Management is responsible for the other information. The other information comprises the Management's Discussion and Analysis.

PricewaterhouseCoopers LLP 111-5th Avenue SW, Suite 3100, Calgary, Alberta, Canada T2P 5L3 T: +1 403 509 7500, F: +1 403 781 1825

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

## Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

 Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of

not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The accompanying notes are an integral part of these financial statements.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

These consolidated financial statements are as at and for the years ended December 31, 2022, and 2021. Tabular amounts in thousands of Canadian dollars, unless otherwise stated. Amounts in text are in Canadian dollars unless otherwise stated.

#### 1. **REPORTING ENTITY**

Karve Energy Inc. ("Karve" or the "Company") is a growth-oriented, private oil and natural gas company whose principal business activities are the acquisition, exploration and development of oil and gas properties in western Canada.

The Company was incorporated under the laws of the Province of Alberta on January 30, 2014, under the name "1799380 Alberta Ltd.". On June 16, 2014, the Company changed its name to "Bruin Oil & Gas Inc." ("Bruin") and on September 15, 2016, the Company changed its name to "Karve Energy Inc.". On July 15, 2019, the Company amalgamated with High Ground Energy Inc.

The consolidated financial statements of the Company are comprised of Karve and its wholly-owned subsidiary "DTC Energy Inc." which was incorporated under the laws of the Province of Alberta.

Karve's head office is located at Suite 1700, 205 5 Avenue SW, Calgary Alberta, T2P 2V7.

#### 2. BASIS OF PRESENTATION

#### Statement of Compliance and Authorization

The consolidated financial statements (the "financial statements") have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of financial statements. Certain comparative figures have been reclassified to conform to the current year presentation.

The financial statements were approved and authorized for issue by Karve's Board of Directors on March 22, 2023.

#### **Basis of Measurement**

These financial statements have been prepared on the historical cost basis, except for the revaluation to fair value of certain financial assets and financial liabilities, as required under IFRS and described in the significant accounting policies in NOTE 3 below. The financial statements are measured and presented in Canadian dollars as the functional currency of the Company.

#### **Principles of Consolidation**

The consolidated financial statements include the accounts of Karve and its subsidiaries. Subsidiaries are entities controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. As at December 31, 2022, the Company has one wholly-owned subsidiary, DTC Energy Inc. The financial statements of subsidiaries are prepared for the same reporting period as Karve, using uniform accounting policies. Subsidiaries are consolidated from the date of acquisition of control and continue to be consolidated until the date there is a loss of control. All intercompany balances, transactions, revenue and expenses are eliminated on consolidation.

#### Use of Estimates and Judgments

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses for the periods reported. Actual results may differ from such estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis and revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future years affected. Significant judgments, estimates and assumptions made by management in these financial statements are outlined below:

#### a) Impairment of Financial Assets

The loss allowances for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making assumptions and selecting inputs to the impairment calculation based on the Company's history, existing market conditions and forward-looking estimates at the end of each reporting period.

#### b) Business Combinations

Business combinations are accounted for using the acquisition method of accounting. The determination of fair value often requires management to make assumptions and estimates about future events. The assumptions and estimates with respect to determining the fair value of exploration and evaluation assets and petroleum and natural gas assets acquired generally require the most judgment and include estimates of reserves acquired, forecast benchmark commodity prices and discount rates.

Changes in any of the assumptions or estimates used in determining the fair value of acquired assets and liabilities could impact the amounts assigned to assets, liabilities and goodwill purchase price allocation. Future net earnings can be affected as a result of changes in future depletion and depreciation, asset impairment, decommissioning liability, gains on acquisition or goodwill impairment.

#### c) Reserve Estimates

Reserve estimates impact a number of key areas, in particular, the valuation of property, plant and equipment and the calculation of depletion and depreciation. Petroleum and natural gas assets are depleted on a unit of production basis at a rate calculated by reference to proved and probable reserves determined in accordance with National Instrument 51-101, Standards of Disclosure for Oil and Gas Activities ("NI 51-101") and incorporating the estimated future cost of developing and extracting those reserves. Proved and probable reserves are estimated using independent reservoir engineering reports and represent the estimated quantities of crude oil, natural gas and natural gas liquids which geological, geophysical and engineering data demonstrate with a specified degree of certainty to be recoverable in future years from known reservoirs and which are considered commercially producible. Reserve estimates, although not reported as part of the Company's consolidated financial statements, can have a significant effect on net income, assets and liabilities as a result of their impact on depletion and depreciation, decommissioning liabilities, deferred taxes, asset impairments and business combinations. Independent reservoir engineers perform evaluations of the Company's oil and natural gas reserves on an annual basis. The estimation of reserves is an inherently complex process requiring significant judgment. Estimates of economically recoverable oil and natural gas reserves are based upon a number of variables and assumptions such as geoscientific interpretation, production forecasts, commodity prices, costs and related future cash flows, all of which may vary considerably from actual results. These estimates are expected to be revised upward or downward over time, as additional information such as reservoir performance becomes available or as economic conditions change. See NOTE 7 for further details.

#### d) Technical Feasibility and Commercial Viability of Exploration and Evaluation Assets ("E&E")

The determination of technical feasibility and commercial viability, based on the presence of proved and probable reserves, results in the transfer of assets from exploration and evaluation assets to petroleum and natural gas assets. As discussed above, the estimate of proved and probable reserves is inherently complex and requires significant judgement. Thus any material change to reserve estimates could affect the technical feasibility and commercial viability of the underlying assets. See NOTE 7 for further details.

#### e) Impairment Indicators and Discount Rate

For purposes of impairment testing, petroleum and natural gas assets are aggregated into cash-generating units ("CGUs"), based on separately identifiable and largely independent cash inflows. The determination of the Company's CGUs and indicators of impairment are subject to significant judgment. The Company currently has one CGU.

The recoverable amount of CGUs and individual assets have been determined based on the higher of the value-in use calculations and fair value less costs of disposal. These calculations require the use of estimates and assumptions, including the discount rate. It is possible that the commodity price assumptions may change due to multiple factors including a global pandemic, natural disaster, inventory levels, exchange rates, weather, economic and geopolitical factors and supply and demand. These factors could be impacted by the rate at which global energy markets transition to lower carbon-based economies and impact the estimated life of the field and economical reserves recoverable and may require an adjustment to the carrying value of petroleum and natural gas assets. The Company monitors internal and external indicators of impairment relating to its assets and records adjustments, if necessary, at each reporting period date. See NOTE 7 for further details.

#### f) Decommissioning Liabilities

At the end of the operating life of the Company's facilities and properties and upon retirement of its oil and natural gas assets, decommissioning costs will be incurred by the Company. Estimates of these costs are subject to uncertainty associated with the method, timing and extent of future decommissioning activities. The liability, the related asset and the expense are impacted by estimates with respect to the costs and timing of decommissioning. See NOTE 12 for further details.

#### g) Measurement of Share-Based Compensation

Share-based compensation amounts are determined based on compensation plans in effect and are subject to estimated fair values, volatility, expected life, discount rate, forfeiture rates and the future attainment of performance criteria. The Company is not listed for trading on a public exchange and share prices and trading volatility are based on limited activity and information available from peer companies. See NOTE 15 for further details.

#### h) Income Taxes

The Company recognizes the net future tax benefit related to deferred tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred tax assets requires the Company to make significant estimates related to expectations of future taxable income. Estimates of future taxable

income are based on forecast cash flows from operation and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the reporting date could be impacted. Additionally, future changes in tax laws in the jurisdictions in which the Company operates could change the ability of the Company to obtain tax deductions in future periods. See NOTE 16 for further details.

#### 3. SIGNIFICANT ACCOUNTING POLICIES

#### **Business Combinations**

Acquisitions of subsidiaries and businesses are accounted for using the acquisition method in accordance with IFRS 3, *Business Combinations*. The consideration for each acquisition is measured at the aggregate of the fair values (at the date of exchange) of assets given up, liabilities incurred or assumed, and equity instruments issued by the Company in exchange for control of the assets or acquiree. Goodwill is recognized when the consideration paid exceeds the aggregate fair values of the assets and liabilities acquired. Acquisition-related transaction costs are recognized in the consolidated statement of net income and comprehensive income as incurred.

#### Joint Arrangements

The Company conducts a substantial amount of their activities by taking 100% ownership interest but conducts some of its activities jointly with others through jointly controlled operations which involve the use of assets and other resources of the Company and other venturers rather than the establishment of a corporation, partnership or other entity. The financial statements include only the Company's proportionate share of jointly controlled sale or use of its share of the joint operation's output, together with its share of the expenses incurred by the joint operation, and any expenses it incurs in relation to its interest in the joint operation.

#### Property, Plant and Equipment, Exploration and Evaluation Assets

The Company's property, plant and equipment ("PP&E") primarily consists of oil and natural gas development and production assets. PP&E is stated at cost, less accumulated depletion, depreciation, amortization and accumulated impairment losses. Development and production assets represent the cost of developing the commercial reserves and initiating production and are accumulated into major area CGUs for purposes of determining depletion, depreciation, impairment, decommissioning and other financial measurements.

#### Capitalization, Recognition and Measurement

The capital cost of an asset is the aggregate of its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, the initial estimate of the decommissioning provision, and for qualifying assets, borrowing costs. For acquired assets or businesses, the purchase price is the aggregate amount paid and the fair value of any other consideration given to acquire the asset or business. Expenditures on major maintenance, inspections or overhauls and well workovers are capitalized when the item enhances the life or performance of an asset above its original standard. Where an asset or part of an asset that was separately depreciated is replaced and it is probable that future economic benefits associated with the replacement item will flow to the Company, the replacement expenditure is capitalized and the carrying amount of the replaced asset is charged to the consolidated statement of net income and comprehensive income.

When an item of property, plant and equipment is disposed of or when there are no net future economic benefits expected from the continued use of the asset, the asset is removed from the accounts (derecognized), and any gain or loss arising on derecognition (calculated as the difference between the net disposal proceeds and the carrying amount of the item), is recognized in the consolidated statement of net income and comprehensive income.

#### **Exploration and Evaluation Expenditures**

Pre-license costs are recognized in the consolidated statement of net income and comprehensive income as incurred. All exploratory costs incurred subsequent to acquiring the right to explore for oil and natural gas are capitalized. Such costs can typically include costs to acquire land rights in areas with no proved or probable reserves assigned, geological and geophysical costs, and exploration wells. Exploration and evaluation costs initially are capitalized as either tangible or intangible exploration or evaluation assets according to the nature of the assets acquired. Exploration costs are accumulated in areas by exploration area, field or well pending determination of technical feasibility and commercial viability. If, upon review of the technical feasibility and/or commercial viability data, the facts and circumstances suggest that the carrying amount of the exploration expenditures exceeds the recoverable amount, an impairment charge is recognized in the consolidated statement of net income and comprehensive income in the current period. For purposes of impairment testing, exploration and evaluation assets are allocated to CGUs.

The technical feasibility and commercial viability of extracting a mineral resource from exploration and evaluation assets is considered when proved and probable reserves are determined to exist. A review of each exploration license or field is carried out, at least annually, to ascertain whether proved and probable reserves have been discovered. Upon determination of proved and probable reserves, exploration and evaluation assets attributable to those reserves are first tested for impairment and then reclassified from exploration and evaluation assets to development and production assets within property and equipment. If the well or exploration project did not encounter potentially economic oil and gas quantities, the cumulative costs are expensed and reported in exploration and evaluation expense in the current period.

Expired land leases included as undeveloped land in exploration and evaluation are charged to exploration and evaluation expense in the consolidated statement of net income and comprehensive income upon expiry.

#### **Development and Production Expenditures**

Property, plant and equipment, which includes petroleum and natural gas development and production assets, is measured at cost (including directly attributable general and administrative costs) less accumulated depletion and depreciation and accumulated impairment losses. Cost includes lease acquisition, drilling and completion, production facilities, decommissioning costs, geological and geophysical costs and directly attributable costs related to development and production activities, net of any government incentive programs.

#### Depletion, Depreciation and Amortization

The costs related to area cost centres for petroleum and natural gas properties, including related pipelines and facilities, are depleted using a unit-of-production method based on the commercial proved and probable reserves allocated to its CGU.

The net carrying value of oil and gas properties is depleted using the unit of production method by reference to the ratio of production in the period to the related proved and probable reserves as per the most recent reserve reports prior to the reporting date, taking into account estimated future development costs necessary to bring those reserves into production. Future development costs are estimated taking into account the level of development required to produce the reserves as per the most recent reserve reports prior to the reporting date. Proved and probable reserves are estimated using reserve reports and represent the estimated quantities of crude oil, natural gas and natural gas liquids which geological, geophysical and engineering data demonstrate with a specified degree of certainty to be recoverable in future years from known reservoirs and which are considered commercially producible. Petroleum and natural gas assets are not depleted until production commences in the CGU that they are allocated to.

The Company records corporate capital assets at cost and provides depreciation on a straight-line basis over five years which is designed to amortize the cost of the assets over their estimated useful lives. Depreciation methods, useful and residual values are reviewed at each financial year end and adjustments relating to changes in estimates are recorded prospectively.

#### Impairment

At each reporting period the Company assesses whether there are impairment indicators for its property, plant and equipment. If indicators exist, the Company determines if the recoverable amount of the asset or CGU is greater than its carrying amount. A CGU is defined as the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows of other assets or groups of assets. The Company has used geographical proximity, geological similarities, analysis of shared infrastructure, commodity type, assessment of exposure to market risks and materiality to define its CGUs. If the carrying amount exceeds the recoverable amount, the asset or CGU is recorded at its recoverable amount with the reduction recognized in the consolidated statement of net income and comprehensive income. The recoverable amount is the greater of the value in use or fair value less costs of disposal. Fair value is the amount the asset could be sold for in an arm's length transaction. The value in use is the present value of the estimated future cash flows of the asset from its continued use. The fair value less costs of disposal considers the continued development of a property and market transactions in a valuation model. The Company uses the present value of the CGUs estimated future cash flows from both proved and probable reserves in its fair value model. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded entities or other available fair value indicators.

Impairment losses previously recognized are assessed at each reporting date for indications that the loss has decreased or no longer exists. Impairments are reversed in subsequent periods when there has been an increase in the recoverable amount of a previously impaired asset or CGU and these reversals are recognized in the consolidated statement of net income and comprehensive income. The recovery is limited to the original carrying amount less depletion and depreciation that would have been recorded had the asset not been impaired.

#### Leases

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. A lease liability is recognized at the commencement of the lease term at the present value of the lease payments that are not paid at that date. At the commencement date, a corresponding right-of-use asset is recognized at

the amount of the lease liability, adjusted for lease incentives received, retirement costs and initial direct costs. Depreciation is recognized on the right-of-use asset over the lease term. Interest expense is recognized on the lease liabilities using the effective interest rate method and payments are applied against the lease liability.

#### FINANCIAL INSTRUMENTS

#### **Financial Assets and Liabilities**

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions that define the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership. Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Financial assets and financial liabilities are initially recognized at fair value. For those at amortized cost this amount is normally the transaction price plus directly attributable transaction costs. All other transaction costs are expensed as incurred.

The subsequent measurement of the Company's financial instruments depends on their classification determined by the purpose for which the instruments were acquired, as follows:

#### **Financial Derivative Contracts**

Financial Derivative Contracts are included in current assets and liabilities except for those with maturities greater than 12 months after the end of the reporting period, which are classified as non-current assets and liabilities. The Company has not designated any of its financial derivative contracts as effective accounting hedges. The Company's financial derivative contracts are classified as financial assets or liabilities at fair value through profit or loss with changes in fair value recorded in the consolidated statement of net income and comprehensive income.

The Company has accounted for its forward physical delivery sales contracts, which were entered into and continue to be held for the purpose of delivery of non-financial items, in accordance with its expected sale requirements. As such, these contracts are not considered to be derivative financial instruments and have not been recorded at fair value on the consolidated statement of financial position. Realized gains or losses from commodity physical delivery sales contracts are recognized in petroleum and natural gas sales as the contracts are settled.

#### **Trade and Other Receivables**

Accounts receivable are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are carried at amortized cost using the effective interest rate method if the time value of money is significant. Gains and losses are recognized in income when the loans and receivables are derecognized or impaired, as well as through the amortization process. The Company's accounts receivable are comprised of trade and other receivables which are included in current assets due to their short-term nature.

#### **Other Financial Liabilities at Amortized Cost**

Financial liabilities at amortized cost include trade and other payables. Trade and other payables are initially recognized at the amount required to be paid less, when material, a discount to reduce the payables to fair value. Subsequently, trade and other payables are measured at amortized cost using the effective interest rate method. Financial liabilities are classified as current liabilities if payment is due within twelve months. Otherwise, they are classified as non-current liabilities.

#### Investment in Associates

The Company accounts for investments in associates using the equity method of accounting if the Company is considered to have significant influence. Significant influence is generally regarded as the ability to participate in the financial and operational decisions of the associate without having control or joint-control over the associate. Under the equity method of accounting, the carrying value of investment are increased or decreased for the Company's share of equity contributions and withdrawals, as well as the Company's share of income and losses, respectively. In the event of a loss of significant influence, the Company remeasures its retained interest at fair market value with any gain or loss recognized in net income. The investment is then remeasured at fair market value at each subsequent reporting period.

#### **Cash and Cash Equivalents**

Cash and cash equivalents includes cash on hand, deposits held with banks and other short-term highly liquid investments with maturities of three months or less from inception.

#### **Share Capital**

Common shares and are classified as equity. Incremental costs directly attributable to the issuance of shares are recognized as a deduction from equity.

#### **Decommissioning Liabilities**

A decommissioning liability is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be reasonably estimated, and it is probable that a future outflow of economic benefits will be required to settle the obligation. Decommissioning liabilities are determined by discounting the expected future cash flows at a credit-adjusted riskfree rate at the reporting date. The obligation is recorded as a liability on a discounted basis using the relevant credit-adjusted risk-free rate, with a corresponding increase to the carrying amount of the related asset. Over time, the liabilities are accreted for the change in their present value and the capitalized costs are depleted on a unit-of-production basis over the life of the asset. Revisions to the discount rate, estimated timing or amount of future cash flows would also result in an increase or decrease to the decommissioning liability and related asset and the related earnings impact reported in current and future periods.

#### **Revenue Recognition**

Revenue associated with the sales of crude oil, natural gas, and natural gas liquids ("NGLs") owned by the Company is recognized when title passes from the Company to its customer, the price is determinable, and collection of the sales price is reasonably assured. This generally occurs when product is physically transferred into a vessel, pipeline or other delivery mechanism. Revenues from processing activities are recognized over time as processing occurs and are generally billed monthly.

Karve has applied the practical expedient to recognize revenue in the amount to which the Company has the right to invoice. As such, no disclosure is included relating to the amount of transaction price allocated to remaining performance obligations and when these amounts are expected to be recognized as revenue.

#### Share-based Compensation and Other Compensation Plans

The Company follows the fair value method of valuing stock option grants and warrants. Share-based compensation amounts are determined based on the estimated fair value of shares on the date of grant of the option or warrant. Forfeitures are estimated at the grant date and are subsequently adjusted to reflect actual forfeiture realized. The expense is recognized over the service period, with a corresponding increase to contributed surplus.

The fair value of shares issued to officers and employees of the Company at a discount to market prices are recognized as a share based compensation expense over the service period, with a corresponding increase to contributed surplus.

#### Income Taxes

The Company follows the liability method of accounting for income taxes. Under this method, deferred tax is recognized for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized on the initial recognition of assets or liabilities in a transaction that is not a business combination. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when the deferred tax asset or liabilities are offset if there is a legally enforceable right to offset and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized to the extent that it is probable that future taxable income will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

The effect of a change in income tax rates on deferred income taxes is recognized in net income in the period in which the change occurs.

#### **Earnings per Share**

Basic and diluted earnings per share ("EPS") is computed by dividing the net earnings available to common shareholders by the weighted average number of shares outstanding during the reporting period. Diluted net income per share is calculated by adjusting the weighted average number of common shares outstanding for dilutive instruments. The Company's potentially dilutive common shares comprise stock options and performance warrants granted. The number of shares included with respect to stock options and performance warrants is computed using the treasury stock method.

#### FUTURE ACCOUNTING PRONOUNCMENTS

#### Amendments to IAS 1 Presentation of Financial Statements

The Company plans to adopt the following amendments to accounting standards, issued by the IASB. Each is not expected to have a material impact on the financial statements.

In January 2020, the IASB issued amendments to IAS 1 *Presentation of Financial Statements* ("IAS 1"), to clarify its requirements for the presentation of liabilities as current or non-current in the statement of financial position. This will be effective on January 1, 2024.

In October 2022, the IASB issued amendments to IAS 1, which specify the classification and disclosure of a liability with covenants. This will be effective on January 1, 2024.

#### 4. TRADE AND OTHER RECEIVABLES

	As at	As at
(\$000s)	Dec. 31, 2022	Dec. 31, 2021
Trade	21,567	17,180
Joint venture	1,447	1,626
Allowance for doubtful accounts	(296)	(328)
TRADE AND OTHER RECEIVABLES	22,718	18,478

In determining the recoverability of receivables, the Company uses the ECL model and considers the age of the outstanding receivable and the credit worthiness of the counterparties. The Company recorded a provision of \$296,000 at December 31, 2022 as it determined certain joint venture receivables were uncollectible using the ECL model (December 31, 2021 - \$328,000).

Of the Company's accounts receivable at December 31, 2022, approximately 61% was receivable from two oil marketers (33% and 28%). At December 31, 2021, approximately 63% was receivable from two oil marketers (34% and 29%). Accounts receivable outstanding greater than ninety days at December 31, 2022 was \$755,000 (December 31, 2021 - \$1.2 million).

## 5. PREPAIDS AND DEPOSITS

PREPAIDS AND DEPOSITS	9,073	4,768
Deposits	57	13
Prepaids	9,016	4,755
(\$000s)	Dec. 31, 2022	Dec. 31, 2021
	As at	As at

Included in prepaids are deposits on casing and other equipment for the 2023 capital program.

#### 6. TRADE AND OTHER PAYABLES

	As at	As at
_(\$000s)	Dec. 31, 2022	Dec. 31, 2021
Trade	22,308	10,958
Accrued	7,860	6,231
Royalties	1,820	1,682
GST	390	338
Joint venture	2,088	438
TRADE AND OTHER PAYABLES	34,466	19,647

## 7. CAPITAL ASSETS

The following table reconciles movement of Petroleum and natural gas ("P&NG") assets, corporate assets, and exploration and evaluation ("E&E") assets during the year:

	Petroleum and		Total Property,	Exploration &
	Natural Gas	Corporate	Plant and	Evalutation
COST (\$000s)	Assets	Assets	Equipment	Assets
BALANCE AT DECEMBER 31, 2020	490,305	982	491,287	21,125
Additions	70,204	6	70,210	531
Transfers to (from) P&NG/E&E assets	516	-	516	(516)
Change in decommissioning provision (NOTE 12)	1,541	-	1,541	-
Expiries	-	-	-	(2,881)
Dispositions (NOTE 8)	(777)	-	(777)	-
BALANCE AT DECEMBER 31, 2021	561,789	988	562,777	18,259
Additions	103,684	112	103,796	452
Transfers to (from) P&NG/E&E assets	486	-	486	(486)
Change in decommissioning provision (NOTE 12)	748	-	748	-
Expiries	-	-	-	(2,226)
BALANCE AT DECEMBER 31, 2022	666,707	1,100	667,807	15,999
ACCUMULATED DD&A (\$000s)				
BALANCE AT DECEMBER 31, 2020	174,301	463	174,764	-
Depletion, depreciation and amortization	48,061	188	48,249	-
BALANCE AT DECEMBER 31, 2021	222,362	651	223,013	-
Depletion, depreciation and amortization	55,439	178	55,617	-
BALANCE AT DECEMBER 31, 2022	277,801	829	278,630	-
NET CARRYING AMOUNT, DECEMBER 31, 2021	339,427	337	339,764	18,259
NET CARRYING AMOUNT, DECEMBER 31, 2022	388,906	271	389,177	15,999

#### Petroleum and Natural Gas Assets

At December 31, 2022, future development and production costs of \$474.8 million (December 31, 2021 - \$446.4 million) are included in costs subject to depletion.

General and administration costs capitalized by the Company during the year ended December 31, 2022 were \$1.7 million (year ended December 31, 2021 – \$1.2 million).

The Company assessed for indicators of impairment and there were no indicators of impairment at December 31, 2022 or 2021.

#### **Exploration and Evaluation**

Exploration and evaluation assets consist of the Company's undeveloped land, seismic, geological and geophysical costs and exploration projects that are pending the determination of technical feasibility.

The Company assessed for indicators of impairment and there were no indicators of impairment at December 31, 2022 or 2021.

#### 8. **DISPOSITIONS**

On August 25, 2021, the Company sold a majority of its royalty income assets for net proceeds of \$34.1 million (after closing adjustments). The disposition was effective July 1, 2021. Transaction costs related to the disposition totalled \$429,000. The disposed assets included 275 gross sections of fee title lands and 130 gross sections of gross overriding royalty ("GORR") lands excluding fee title and GORR lands within the Karve core Viking properties. The annualized fee income associated with the disposed assets based on income from the first six months of 2021 was approximately \$4.4 million. The estimated carrying value of the assets disposed and gain on disposition are summarized below:

(\$000s)	
Property, plant and equipment	777
CARRYING VALUE OF NET ASSETS DISPOSED	777
CASH PROCEEDS, AFTER CLOSING ADJUSTMENTS	34,095
GAIN ON DISPOSITION	33,318

#### 9. RIGHT OF USE ASSETS

The following table reconciles the movement of right of use assets during the year:

Balance at December 31, 2021	1,312
Additions	-
BALANCE AT DECEMBER 31, 2022	1,312

Balance at December 31, 2021	(886)
Depreciation and amortization	(197)
BALANCE AT DECEMBER 31, 2022	(1,083)
NET CARRYING AMOUNT, DECEMBER 31, 2022	229

#### **10. LEASE LIABILITY**

The Company has lease liabilities for office space. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. Lease liabilities were measured at a discounted value of lease payments using a weighted average incremental borrowing rate of 5% at April 1, 2021.

_(\$000s)		
Balance at December 31, 2021		602
Interest expense		30
Lease payments		(283)
BALANCE AT DECEMBER 31, 2022		349
	As at	As at
	Dec. 31, 2022	Dec. 31, 2021
Lease liability - current	309	253
Lease liability - long term	40	349
TOTAL LEASE LIABILITY AT DECEMBER 31, 2022	349	602

The Company has an office lease agreement effective April 1, 2021 to February 28, 2024.

Undiscounted cash outflows related to lease liabilities are:

(\$000s)	Within 1 year	1 to 5 years	Total
Lease payments	326	43	369

#### 11. OPERATING LOAN AND LONG TERM DEBT

As at December 31, 2022, the Company had total bank credit facilities of \$55.0 million, comprised of a \$48.0 million Credit Facility and a \$7.0 million operating loan. The Credit Facility is a committed 364 days + 1 year and extendible upon agreement annually and is shown as long term debt on the Company's balance sheet. The operating loan is shown as a current liability. The Credit Facility and operating loan incur interest based on the applicable Canadian prime rate or Banker's Acceptance rate plus between 1.75% and 4.75% depending on the type of borrowing and the Corporation's debt to EBITDA ratio. The Company is also subject to a standby fee of 0.6875% to 1.1875% based on the Corporation's debt to EBITDA ratio. The next annual review date is May 2023.

As at December 31, 2022, \$19.8 million (net of unamortized debt issue costs) (December 31, 2021 - \$26.8 million) was drawn on the Credit Facility and \$3.1 million (December 31, 2021 - \$nil) was drawn on the operating loan.

The Company has issued letters of credit of \$400,000 as at December 31, 2022 (December 31, 2021 - \$951,000), thereby reducing the available bank credit facility by this amount.

Bank debt as at December 31, 2022 and December 31, 2021 is as follows:

TOTAL BANK DEBT	22,914	26,823
Bank operating loan	3,119	-
LONG TERM DEBT	19,795	26,823
Less: unamortized debt issue costs	(205)	(177)
Credit Facility	20,000	27,000
(\$000s)	Dec. 31, 2022	Dec. 31, 2021
	As at	As at

Financing expense for the year ended December 31, 2022 and 2021 is comprised of the following:

	For the year end	
(\$000s)	Dec. 31, 2022	Dec. 31, 2021
Credit facility interest and charges	865	1,945
Operating loan interest and charges	264	108
Amortization of debt issue costs	166	131
Interest on lease liability	30	36
FINANCING EXPENSES	1,325	2,220

For the year ended December 31, 2022, the effective interest rate on the credit facility was 7.65% (December 31, 2021 – 4.46%).

#### **12. DECOMMISSIONING LIABILITY**

At the end of the operating life of the Company's facilities and properties and upon retirement of its oil and natural gas assets, decommissioning costs will be incurred by the Company to abandon and reclaim the wells and facilities. Estimates of these costs are subject to uncertainty associated with the method, timing and extent of future decommissioning activities and the discount rate applied in measuring the liability. The liability, the related asset and the expense are impacted by estimates with respect to the costs and timing of decommissioning.

The Company estimates its total undiscounted amount of cash flows required to settle its decommissioning liability is approximately \$185.5 million (\$107.2 million undiscounted, uninflated) (December 31, 2021 - \$180.4 million and \$101.4 million respectively), which will be incurred over the remaining life of the assets with the costs to be incurred between 2023 and 2065. The estimated future cash flows have been discounted using a credit adjusted rate of 12% (December 31, 2021 – 11%) and an inflation rate of 2% (December 31, 2021 – 2%). The change in estimate for the year ended December 31, 2022 relates to an increase in costs of abandonment for 2023 and 2024; and an increase to the credit adjusted discount rate from 11% to 12%. The change in estimate for the year ended December 31, 2021 relates to a change in the estimated timing of abandonment and reclamation expenses.

On May 1, 2020, the Alberta Department of Energy initiated the Site Rehabilitation Program ("SRP") whereby it provided funding in the form of grant payments to the oil field services sector to abandon and/or reclaim upstream oil and gas infrastructure. Pursuant to the SRP, the Company was approved for up to \$5.8 million in SRP funding. As at December 31, 2022, the Company recognized \$4.4 million in SRP funding (December 31, 2021 - \$3.1 million). When work is completed and paid to third party

contractors, decommissioning liability is reduced with an off-setting credit to depletion, depreciation and amortization in the consolidated statement of income and comprehensive income.

The following table shows changes in the decommissioning liability:

	As at	As at
(\$000s)	Dec. 31, 2022	Dec. 31, 2021
Balance, beginning of year	20,852	21,659
Decommissioning liabilities incurred during the year	264	76
Decommissioning liabilities settled during the year	(2,547)	(1,847)
Decommissioning liabilities settled during the year through SRP	(1,331)	(2,887)
Accretion expense during the year	2,297	2,386
Change in estimate	484	1,465
BALANCE, END OF YEAR	20,019	20,852
Decommissioning liability - current	4,126	4,222
Decommissioning liability - long term	15,893	16,630
TOTAL DECOMMISSIONING LIABILITY - END OF YEAR	20,019	20,852

#### **13. SHARE CAPITAL**

#### a) Authorized

Unlimited number of common voting shares.

Unlimited number of preferred shares, issuable in series.

#### b) Issued and Outstanding Common Shares

(\$000s except for share amounts)	Number	Amount
Common Shares		
BALANCE AT DECEMBER 31, 2020, and 2021	140,529,665	225,158
Return of capital	-	(49,185)
BALANCE AT DECEMBER 31, 2022	140,529,665	175,973

On July 1, 2022, the Company notified its Shareholders that the Company would reduce its stated capital by \$49.2 million in the aggregate, representing a Return of Capital of \$0.35 per Common Share. The Company distributed that amount to the holders of the Common Shares (the "Return of Capital"). The record date for determining the holders of Common Shares entitled to receive the Return of Capital was the close of business on July 15, 2022 and the Return of Capital was paid on July 29, 2022.

#### c) Contributed Surplus

	As at	As at
(\$000s)	Dec. 31, 2022	Dec. 31, 2021
Balance, beginning of year	30,645	27,948
Share-based compensation - options	1,188	1,394
Share-based compensation - warrants	650	1,303
BALANCE, END OF YEAR	32,483	30,645

#### d) Per Share Amounts

For th		ne year ended
_(\$000s except per share amounts)	Dec. 31, 2022	Dec. 31, 2021
Net income for the year	71,141	39,100
Weighted average number of shares - basic	140,529,665	140,529,665
Dilutive impact of share-based compensation plans	15,712,527	5,411,065
Weighted average number of shares - diluted	156,242,192	145,940,730
Net income per share - basic	0.51	0.28
Net income per share - diluted	0.46	0.27

## 14. OTHER INCOME

The following table presents the composition of amounts included in Other Income in the consolidated statements of net income and comprehensive income:

	For th	For the year ended	
(\$000s)	Dec. 31, 2022	Dec. 31, 2021	
Processing fee income	4,491	3,608	
Royalty income	281	3,113	
Other	250	163	
TOTAL OTHER INCOME	5,022	6,884	

Processing fee income relates to the Company processing third party oil and gas volumes through Karve owned and operated facilities.

Royalty income relates to freehold royalties, gross overriding royalties, royalties paid to the Company on fee title lands, and net profit interests. On August 25, 2021, the Company sold a majority of its royalty income assets, effective July 1, 2021, for net proceeds of \$34.1 million (after closing adjustments). See NOTE 8 – Dispositions.

#### **15. SHARE-BASED COMPENSATION**

The following table summarizes the Company's share-based compensation:

	For th	ne year ended
(\$000s)	Dec. 31, 2022	Dec. 31, 2021
Share-based compensation - options	1,188	1,394
Share-based compensation - performance warrants	650	1,303
TOTAL SHARE-BASED COMPENSATION	1,838	2,697

#### a) Stock Options

Effective June 15, 2016, the Company adopted a new stock option plan under which officers, management, employees, directors and consultants of the Company are eligible to receive grants. Under the stock option plan, which was approved by the Board of Directors, the granted stock options vest to the grantee over a three-year period, the grantee has the right to exercise the stock options for seven years from the date of the grant and the stock options terminate 30 days following the termination of the grantee's employment. All stock options vest and may be exercisable in the event of a change of control or initial public offering. The maximum number of outstanding stock options under the plan is limited to 10% of the common shares outstanding. Stock option grants and the option exercise price are set by the Board of Directors at the time of grant. On November 6, 2019, an extension of 2 years to the expiry date (from 5 years to 7 years) for options outstanding was approved by the Board of Directors. On November 25, 2022, an extension of 2 years to the expiry (from 7 years to 9 years) for options outstanding was approved by the Board of Directors.

Share-based compensation expense related to stock options during the year ended December 31, 2022 was \$1.2 million (year ended December 31, 2021 - \$1.4 million).

The following table sets forth a reconciliation of the stock option plan activity from December 31, 2020 through to December 31, 2022:

		Ntd. Avg.
	Exerc	ise Price
	Number	(\$) (1)
Balance at December 31, 2020	13,848,260	1.44
Granted	200,000	1.90
Forfeited	(312,000)	1.84
BALANCE AT DECEMBER 31, 2021	13,736,260	1.44
Granted	297,500	3.09
Forfeited	(81,000)	1.80
BALANCE AT DECMEBER 31, 2022	13,952,760	1.47
		222

(1) Weighted average exercise prices have been adjusted due to the \$0.35 per share return of capital distribution paid on July 29, 2022.

There were no stock options exercised during the year ended December 31, 2022 (December 31, 2021 – nil) and there were 13,438,592 options exercisable as at December 31, 2022 (December 31, 2021 - 12,087,078 options exercisable).

The range of exercise prices of the outstanding options and weighted average contractual life remaining as at December 31, 2022 were as follows:

	Wtd. Avg.	Number of	Number of
	Contractual	options	options
Exercise Price Range <sup>(1)</sup>	Life Remaining	outstanding	exercisable
\$0.50	1.72	2,320,976	2,320,976
\$0.51 - \$1.64	2.53	1,667,357	1,667,357
\$1.65 - \$3.09	4.44	9,964,427	9,450,259
	3.76	13,952,760	13,438,592

(1) Exercise prices have been adjusted due to the \$0.35 per share return of capital distribution paid on July 29, 2022.

The fair value of each option granted or acquired is estimated on the date of grant or acquisition using the Black-Scholes option pricing model with the following weighted average assumptions:

	For the year ended
	Dec. 31, 2022
Weighted average fair value of options granted	1.77
Risk-free Interest rate (%)	2.83%
Expected life (years)	5.8
Estimated volatility of underlying common shares (%)	61%
Weighted average grant date share price	3.09
Forfeiture rate	3%
Expected dividend yield (%)	

The expected volatility of the options granted is based on the historical volatility of publicly traded peer companies that in management's judgement have similar characteristics to the Company and are therefore a good indicator of the expected volatility of the Company.

#### b) Performance Warrants

There were no performance warrants issued by the Board of Directors during the year ended December 31, 2022 (year ended December 31, 2021 – nil).

The performance warrants entitle the holder to purchase one common share of the Company and have the following vesting dates and exercise prices:

	2016 Issuance	2017 Issuance
Warrants granted	16,125,000	17,937,500
Issue date	\$1.50	\$3.00
First anniversary	\$1.70	\$3.40
Second anniversary	\$1.90	\$3.80
Third anniversary	\$2.10	\$4.20
Fourth anniversary	\$2.30	\$4.60

The right to exercise the performance warrants is subject to a performance event taking place which includes the occurrence of any of the following (i) the Company raising a minimum of \$25.0 million through a private placement, excluding the securities issued as part of the recapitalization that occurred in June 2016 (ii) the occurrence of an initial public offering on a recognized Canadian or U.S. stock exchange, or (iii) a change of control. Only vested performance warrants based on the schedule above will become exercisable if the Company achieves performance event (i). In the event of performance event (ii) and (iii), all performance warrants outstanding which have not vested or become exercisable in accordance with their terms shall vest and become exercisable immediately. On November 6, 2019, an extension of 2 years to the expiry date (from 5 years to 7 years) for performance warrants was approved by the Board of Directors. On November 25, 2022, an extension of 2 years to the expiry (from 7 years to 9 years) for options outstanding was approved by the Board of Directors.

Share-based compensation expense related to performance warrants during the year ended December 31, 2022 was \$650,000 (year ended December 31, 2021 - \$1.3 million).

The following table sets forth a reconciliation of performance warrant activity from December 31, 2020 through to December 31, 2022:

		Wtd. Avg.	
	Exercise Price		
	Number	(\$) <sup>(1)</sup>	
Balance at December 31, 2020	32,067,500	2.52	
Forfeited	(174,000)	3.45	
BALANCE AT DECEMBER 31, 2021	31,893,500	2.51	
Forfeited	(62,000)	3.45	
BALANCE AT DECMEBER 31, 2022	31,831,500	2.51	

(1) Weighted average exercise prices have been adjusted due to the \$0.35 per share return of capital distribution paid on July 29, 2022.

There were no performance warrants exercised during the year ended December 31, 2022 (year ended December 31, 2021 - nil) and 6,460,000 performance warrants were exercisable at December 31, 2022 and December 31, 2021.

The range of exercise prices of the outstanding performance warrants and weighted average contractual life remaining as at December 31, 2022 were as follows:

	Wtd. Avg.	Number of	Number of
	Contractual	warrants	warrants
Exercise Price Range <sup>(1)</sup>	Life Remaining	outstanding	exercisable
\$1.15 to \$2.64	2.45	15,700,000	6,460,000
\$2.65 to \$3.64	3.49	9,678,900	-
\$3.65 to \$4.25	3.49	6,452,600	-
	2.96	31,831,500	6,460,000

(1) Exercise prices have been adjusted due to the \$0.35 per share return of capital distribution paid on July 29, 2022.

#### **16. INCOME TAXES**

Income tax expense varies from the amount that would be computed by applying the combined basic federal and provincial statutory income tax rates for Canada at December 31, 2022 at 23% (December 31, 2021 – 23%). A reconciliation to the differences is as follows:

	For th	ne year ended
_(\$000s)	Dec. 31, 2022	Dec. 31, 2021
Net income before taxes	92,755	51,918
Combined federal and provincial tax rate	23.0%	23.0%
Computed "expected" tax expense	21,334	11,941
Increase (decrease) in taxes due to:		
Permanent differences	422	623
True-up	(142)	254
TOTAL INCOME TAX EXPENSE	21,614	12,818
Current income tax	-	-
Deferred income tax expense	21,614	12,818
TOTAL INCOME TAX EXPENSE	21,614	12,818

The following table summarizes Karve's net deferred income tax asset at December 31, 2022:

			Recognized in Statement	
	Balance at	Recognized in	of Financial	Balance at
	Jan. 1, 2022	Income (Loss)	Position	Dec. 31, 2022
Non-capital losses	23,508	(12,384)	-	11,124
Share issue costs	141	(12)	-	129
PP&E and E&E assets	(32,372)	(8,054)	-	(40,426)
Other	1,240	(1,164)	-	76
TOTAL DEFERRED INCOME TAX LIABILITY	(7,483)	(21,614)	-	(29,097)

The following table summarizes Karve's net deferred income tax liability at December 31, 2021:

			Recognized in Statement of	
	Balance at	Recognized in	Financial	Balance at
	Jan. 1, 2021	Income (Loss)	Position	Dec. 31, 2021
Non-capital losses	22,463	1,045	-	23,508
Share issue costs	509	(368)	-	141
PP&E and E&E assets	(18,204)	(14,168)	-	(32,372)
Other	567	673	-	1,240
TOTAL DEFERRED INCOME TAX ASSET (LIABILITY)	5,335	(12,818)	-	(7,483)

The following table summarizes Karve's income tax pools available for deduction:

		As at
_(\$000s)	Dec. 31, 2022	Dec. 31, 2021
Non-capital losses	48,064	102,207
Canadian exploration expense	246	246
Canadian development expense	132,957	122,820
Canadian oil and gas property expense	47,813	54,609
Capital cost allowance	73,004	63,430
Share issue costs	560	687
TOTAL TAX POOLS AVAILABLE FOR DEDUCTION	302,644	343,999

## **17. COMMITMENTS**

Future minimum payments under operating leases and pipeline transportation agreements as at December 31, 2022 are as follows:

_(\$000s)	2023	2024	Thereafter	Total
Operating leases	95	17	32	144
Pipeline transportation	1,005	-	-	1,005
TOTAL COMMITMENTS	1,100	17	32	1,149

#### **18. FINANCIAL INSTRUMENTS**

The Company has exposure to credit, liquidity, interest, and foreign currency risk from its use of financial instruments. Further qualitative disclosures are included throughout these financial statements.

The Board of Directors has overall responsibility for identifying the principal risks of the Company and ensuring the policies and procedures are in place to appropriately manage these risks. Karve's management identifies, analyzes and monitors risks and considers the implication of the market condition in relation to the Company's activities.

#### a) Fair Value of Financial Instruments

Financial instruments comprise cash and cash equivalents, trade and other receivables, deposits, derivative assets (liabilities), trade and other payables, operating loan, and long term debt.

There are three levels of fair value by which a financial instrument can be classified:

Level 1 - Quoted prices in active markets for identical assets and liabilities such as traded securities on a registered exchange where there are a sufficient frequency and volume of transactions to provide ongoing pricing information.

Level 2 - Inputs other than quoted prices that are observable for the asset and liability either directly and indirectly such as quoted forward prices for commodities, time value and volatility factors which can be substantially observed or corroborated in the marketplace; and

Level 3 - Inputs that are not based on observable market data.

The fair values of the derivative contracts used for risk management as at December 31, 2022 were measured using level 2 observable inputs, including quoted prices received from financial institutions based on published forward price curves as at the measurement date, using the remaining contracted oil and natural gas volumes.

The fair value of cash and cash equivalents, trade and other receivables, deposits, and trade and other payables approximate their carrying amounts due to their short-term maturities. The fair value of the amounts drawn on the operating loan and long term debt is equal to its carrying amount as the facilities bear interest at floating rates and credit spreads that are indicative of market rates.

The following table summarizes Karve's financial instruments at December 31, 2022:

	57,584	57,584
Long term debt	19,795	19,795
Derivative liability (NOTE 18)	204	204
Trade and other payables	34,466	34,466
Operating loan (NOTE 11)	3,119	3,119
Liabilities		
	22,775	22,775
Deposits	57	57
Trade and other receivables	22,718	22,718
Assets		
(\$000s)	cost	value
	Amortized	Total fair

The following table summarizes Karve's financial instruments at December 31, 2021:

	Amortized	Total fair
(\$000s)	cost	value
Assets		
Cash and cash equivalents	5,277	5,277
Trade and other receivables	18,478	18,478
Deposits	13	13
	23,768	23,768
Liabilities		
Trade and other payables	19,647	19,647
Derivative Liability (NOTE 18)	5,212	5,212
Long term debt	26,823	26,823
	51,682	51,682

#### b) Risk Associated with Financial Assets and Liabilities

#### **Commodity Price Risk**

Due to the volatile nature of natural gas and oil commodity prices, the Company is exposed to adverse consequences if commodity prices decline. The Company is exposed to commodity price movements as part of its operations, particularly in relation to the prices received for its oil and gas production. Oil and gas is sensitive to numerous worldwide factors, many of which are beyond the Company's control. Changes in global supply and demand fundamentals in the oil and gas market and geopolitical events can significantly affect oil and gas prices. These factors could be impacted by the rate at which global energy markets transition to lower carbon-based economies. Consequently, these changes could also affect the value of the Company's properties, the level of spending for exploration and development and the ability to meet obligations as they come due. The Company's oil production is sold under short-term contracts, exposing it to the risk of near-term price movements depending on marketing conditions, it is the Company's policy to hedge a portion of its crude oil sales through the use of financial derivative contracts. The Company does not apply hedge accounting to these contracts.

At December 31, 2022, the Company had the following commodity contracts in place:

				Strike Price	Current Liability
Туре	Term	Basis <sup>(1)</sup>	Volume (Bbl/d)	(\$CAD/Bbl) <sup>(1)</sup>	(\$000s)
Put option	Jan. 1/23 - Mar. 31/23	WTI	750	97.50	(204)
TOTAL VOLUME AN	ID WEIGHTED AVERAGE PRICE		750	97.50	(204)

(1) Nymex WTI monthly average in \$CAD.

At December 31, 2022 the fair value of the financial derivative contracts was a current liability position of \$204,000 resulting in an unrealized gain of \$5.0 million for the year ended December 31, 2022 (December 31, 2021 - \$5.2 million current liability and unrealized loss of \$2.8 million). The fair value, or mark-to-market value, of these contracts are based on the estimated amount that would have been received or paid to settle the contracts as at December 31, 2022 and may be different from what will eventually be realized. Assuming all other variables remain constant, a \$5.00 USD increase in WTI would result in an unrealized gain of \$5.0 million and a derivative liability of \$255,000 and a \$5.00 USD decrease in WTI would result in an unrealized gain of \$5.1 million and a derivative liability of \$107,000.

The components of the (loss) gain on financial derivative contracts is as follows:

	For the year ended	
_(\$000s)	Dec. 31, 2022	Dec. 31, 2021
Unrealized gain (loss) financial derivative contracts	5,008	(2,814)
Realized (loss) on financial derivative contracts	(27,850)	(11,415)
LOSS ON FINANCIAL DERIVATIVE CONTRACTS	(22,842)	(14,229)

#### **Interest Rate Risk**

The Company is exposed to interest rate risk to the extent that bank debt is at a floating or short-term rate of interest in relation to interest expense on its long term debt and operating loan facility. The Credit Facility and operating line incur interest based on the applicable Canadian prime rate or Banker's Acceptance rate plus between 1.75% and 4.75% depending on the type of borrowing and the Company's debt to EBITDA ratio and is subject to an annual standby fee on the undrawn portion. As at December 31, 2022, \$20.0 million (December 31, 2021 - \$27.0 million) was drawn on the Credit facility (\$19.8 million – net of amortized debt issue costs). Currently the Company has not entered into any agreements to manage this risk. An increase (decrease) in the interest rate by 1% would result in an increase (decrease) to net income before tax of \$145,000 for the year ended December 31, 2022 (year ended December 31, 2021 - \$460,000).

#### **Liquidity Risk**

The Company's approach to managing liquidity risk is to have sufficient cash and/or credit facilities to meet its obligations when due. Management typically forecasts cash flows for a period of 12 months to identify any financing requirements. Liquidity is managed through daily and longer-term cash, debt, and equity management strategies. These include estimating future cash generated from operations based on reasonable production and pricing assumptions, estimating future discretionary and non-discretionary capital expenditures and assessing the amount of equity or debt financing available.

A contractual maturity analysis for the Company's financial liabilities as at December 31, 2022 is as follows:

(\$000s)	Within 1 year	1 to 5 years	Total
Bank indebtedness	3,119	-	3,119
Trade and other payables	34,466	-	34,466
Derivative liability	204	-	204
Lease liabilities	326	43	369
Long term debt	-	19,795	19,795
TOTAL	38,115	19,838	57,953

A contractual maturity analysis for the Company's financial liabilities as at December 31, 2021 is as follows:

(\$000s)	Within 1 year	1 to 5 years	Total
Trade and other payables	19,647	-	19,647
Derivative liability	5,212	-	5,212
Lease liabilities	219	433	652
Long term debt	-	26,823	26,823
TOTAL	25,078	27,256	52,334

#### **19. CAPITAL MANAGEMENT**

#### a) Capital Base

In order to continue the Company's future exploration and development program, the Company must maintain a strong capital base to enable access to equity and debt markets. The Company continually monitors the risk/reward profile of its exploration and development projects and the economic indicators in the market including commodity prices, interest rates and foreign exchange rates. After considering these factors, revisions to the Company's capital budget are made upon the approval of the Board of Directors.

The Company considers shareholders' capital and net debt/adjusted positive working capital (excluding derivative assets and current portion decommissioning liability) as components of its capital base. The Company can access or increase capital through the issuance of shares, through bank borrowings (based on reserves) and by building cash reserves by reducing its capital expenditure program.

The following table represents the net capital of the Company:

CAPITAL BASE	304,558	288,406
NET DEBT	(25,589)	(17,947)
Long term debt	(19,795)	(26,823)
Trade and other payables	(34,466)	(19,647)
Total current assets	31,791	28,523
Shareholders' Equity	330,147	306,353
(\$000s)	Dec. 31, 2022	Dec. 31, 2021
	As at	As at

The Company monitors its capital based primarily on its Net debt to annualized funds flow ratio. Net debt is defined as long term debt plus any net working capital deficiency excluding derivative contract asset/liability, current portion of decommissioning liability, and current portion of lease liability. Annualized funds flow is calculated as cash flow from operations before changes in non-cash working capital for the Company's most recent quarter, multiplied by four. To facilitate the management and control its' capital base, the Company prepares annual operating and capital expenditure budgets. The budgets are updated when critical factors change. These include economic factors such as the state of equity markets, changes to commodity prices, interest rates and foreign exchange rates and Company specific factors or assumptions such as the Company's drilling results and its production profile. The Company's Board of Directors approves the budget and changes thereto. At December 31, 2022, the Company had net debt of \$25.6 million (December 31, 2021 – \$17.9 million).

The Company's share capital is not subject to external restrictions, but the Company does have key covenants of the credit facilities that include standard business operating covenants. As at December 31, 2022, the Company is in compliance with all covenants and management expects to comply with all terms during the subsequent 12-month period.

#### 20. SUPPLEMENTAL INFORMATION

The following table presents the composition of changes in non-cash working capital and the allocation to operating and investing activities:

	For the y	
(\$000s)	Dec. 31, 2022	Dec. 31, 2021
CHANGES IN NON-CASH WORKING CAPITAL:		
Trade and other receivables (NOTE 4)	(4,260)	(7,679)
Prepaids and deposits (NOTE 5)	(4,305)	145
Trade and other payables (NOTE 6)	14,819	8,528
TOTAL CHANGES IN NON-CASH WORKING CAPITAL	6,254	994
CHANGES IN NON-CASH WORKING CAPITAL RELATED TO:		
Operating activities	(2,386)	(3,436)
Investing activities	8,640	4,430
TOTAL CHANGES IN NON-CASH WORKING CAPITAL	6,254	994

The following table provides a detailed breakdown of the cash and non-cash changes in financing liabilities arising from financing activities:

Long term	Lease

166	-
19,795	349
	debt 53,374 - (26,682) 131 <b>26,823</b> 19,972 (27,166) 166

The following table presents the amount of total employee compensation costs included in the general and administration and operating expense categories, and share-based compensation recognized for the vesting of stock options and performance warrants granted to employees:

	For the year ended	
_(\$000s)	Dec. 31, 2022	Dec. 31, 2021
General and administration	8,994	8,748
Operating	3,006	3,293
Share-based compensation	1,863	2,698
TOTAL EMPLOYEE COMPENSATION COSTS	13,863	14,739

The following table presents the composition of petroleum & natural gas sales by product:

	For the year ended	
_(\$000s)	Dec. 31, 2022	Dec. 31, 2021
Crude oil	241,728	130,947
Natural gas liquids	10,231	6,028
Natural gas	27,656	16,625
TOTAL PETROLEUM AND NATURAL GAS SALES	279,615	153,600

#### 21. RELATED PARTY DISCLOSURES

#### a) Key Management Personnel

Key management is defined as the Board of Directors and Officers of the Company. The table below summarizes the fair value of compensation and other fees paid to key management:

For th	ie year ended
Dec. 31, 2022	Dec. 31, 2021
1,001	1,588
3,148	2,720
4,149	4,308
	Dec. 31, 2022 1,001 3,148

### 22. SUBSEQUENT EVENT

Subsequent to December 31, 2022, the Company entered into an Average Rate Collar for the notional amount of \$3.5 million USD for the period April 2023 to December 2023 with a floor of 1.3400 and ceiling of 1.3960.
